Qr8 Mediskin

FOR HEALTH PROFESSIONALS

Medical skin care without the dermatology wait.

Your patients seen by video within a week, supported by our dermatology nursing team between reviews, with a summary sent back to you.

30,000+	< 1 week	$55	Support
doctor video consultations since 2019	to first doctor appointment	skin consult ($110 hair). Private billing	Expert dermatology nurse support between every doctor review*

REFER WHEN YOUR PATIENT

- Needs ongoing treatment and review, not a one-off prescription
- Hasn't responded to, or tolerated, first-line treatment
- Would otherwise wait months for a dermatologist review
- Needs more education and follow-up support than a standard consult allows

CONDITIONS WE MANAGE

Acne · Rosacea · Periorificial dermatitis · Melasma and hyperpigmentation · Photoageing and sun damage · Male and female pattern hair loss · Peri/menopausal skin changes. Ages 12+.

NOT SUITABLE FOR

Skin checks or suspicious lesions · Urgent or severe presentations

WHAT YOUR PATIENT GETS

1. We contact them within one business day. They complete a health questionnaire and clinical photos.
2. A real-time video consultation with an Australian-registered GP trained in medical skin and hair care. Never asynchronous 'tick and flick' prescribing.
3. A written treatment plan and compounded prescription topicals. Delivered within 3-5 days.
4. Unlimited dermatology nurse support by phone, email and video, with doctor reviews every 3 months.
5. Escalation to dermatology or in-person care through established referral pathways if needed.

WHAT YOU GET

- A consultation summary after every doctor review, with patient consent
- Confidence your patient is well cared for: coordinated, ongoing medical and nursing care for their skin condition, not fragmented care, delivered in collaboration with you as their usual GP

Education and ongoing clinical support are established strategies for improving adherence in chronic inflammatory skin disease. Eicher L et al. J Eur Acad Dermatol Venereol. 2019;33.
